

Thank you for taking the time to have a look at this free sample – which demonstrates just a very small part of the content of our popular **Puzzles & Fun** e-book which covers the **database** and **SQL** domains.

This fantastic 27-page revision fun pack comprises:

- Jumbo crossword 1 (covering data models and database design) – **50 clues**
- Jumbo crossword 2 (covering the whole SQL language) – **105 clues**
- Jumbo crossword 3 (covering technical database issues) – **66 clues**
- Jumbo word search 1 (covering databases) – **53 terms** (and a secret message)
- Jumbo word search 2 (covering SQL) – **60 terms** (and a secret message)
- A large set of conundrums (and clues) – **32 anagrams** for you to unscramble

Plus we supply **full solutions to every puzzle** – just in case!

This fun pack is designed to get you really thinking about *system scope*, the *domain of discourse*, *entity relationship models*, *relational models*, *normalization*, *SQL keys*, *queries*, *sorting*, *sub-selects*, *aggregate functions*, *attributes*, *joins*, *grouping*, *wildcards*, *data types* and a whole lot more *SQL* plus *relational algebra*, *indexing*, *partitioning*, *object-relational features*, *database architectures* and a whole range of other *technical database* topics – all in an enjoyable, novel and interesting way.

Try and beat the cunning clues and crack the crossword, solve the search and conquer the conundrums! If you like mental challenges you'll love this pack. And remember, just in case you get stuck, **full solutions** are given at the end.

Great fun. Great value.
